## HEALTH AND WELLBEING BOARD

Thursday 14 June 2018 at 6.00 pm

### MINUTES

PRESENT: Dr Nandini Mukhopadhyay, Dr Adrian McLachlan, Andrew Eyres, Councillor Jim Dickson (Chair), Amanda Pritchard, Councillor Edward Davie, Annie Hudson and Councillor Jacqui Dyer

APOLOGIES: Catherine Pearson

ALSO PRESENT:

Action  
required by

#### **1. DECLARATIONS OF INTEREST**

None were declared.

#### **2. MINUTES OF PREVIOUS MEETING**

The Chair wished to thank some members who were no longer on the Board.

Councillor Jane Pickard, formerly a Member of the Health and Wellbeing Board, had contributed significantly to the Board for the past several years. The Chair also thanked Councillor Jackie Meldrum who was also no longer a Member on the Health and Wellbeing Board and Councillor Louise Nathanson, who was now a councillor for Wandsworth Council.

The Chair also welcomed new members to the Health and Wellbeing Board including Councillor Ed Davie, Councillor Jacqui Dyer and Ms Fiona Connelly. The Chair also welcomed the permanent appointment of Ms Ruth Hutt as Director of Public Health.

**RESOLVED:** That the minutes of the previous meeting held on 8 February 2018 be approved and signed by the Chair as a correct record of the proceedings.

### 3. LAMBETH CHILDREN PARTNERSHIP UPDATE

Councillor Jane Pickard introduced the report.

The Chair thanked Councillor Pickard for her contribution and stated that her continuing presence at the Board demonstrated her commitment and dedication in the area.

The Board commented that:

- In relation to serious youth violence, a Delivery Board was in place and focused on areas of action. An initial meeting of that Board had good attendance including from Police and Education amongst others. The meeting held a productive discussion and the area was challenging due to a plethora of initiatives that had been implemented in London and it was not clear what worked. One thing that was agreed was outlining communities' and localities' details for many of the community facing events.
- In relation to early help, there had been positive responses. Over 100 organisations attended the launch. In a recent panel meeting, there were approximately 43 community organisations, voluntary and statutory agencies present.
- The Streatham work was a pilot and the plan was to implement it in September –October 2018. There were a number of challenges regarding the resources that would be available. Therefore a coherent joint approach would be sought.

The Chair stated that work on serious youth violence issues was important and a full report should be brought back to Health and Wellbeing Board regarding the strategy.

The Board commented that:

- The London Mayor had a fund to tackle youth violence with a deadline for early July 2018. Lambeth had placed a bid and Public Health representatives should be given an opportunity to provide considerable input into the bid.
- Public Health had been involved with the pilot as part of a task and finish group and were generally involved in the process of the bid. As far as possible, all processes were being streamlined into all areas of work.
- In relation to the Mayor's fund, work was being done with as many organisations as possible as the money would be allocated to the voluntary and community sector.
- Work was being done to ensure that the items that organisations would bid for was based on evidence and things that would make a difference in the area of serious youth violence. Bids granted based on initiatives which went against Lambeth's strategy would not be helpful.
- In relation to early help work, a strong robust evaluation would

not be available given the period of time available.

- Strategies would not be implemented until a proper evaluation of any pilots was completed and monitoring over time would be done to ensure that the arrangements were beneficial.
- A report in the Evening Standard appeared to show a link between truancy and children carrying knives.

RESOLVED:

1) That the contents of the report be noted.

**4. LAMBETH HEALTH AND WELLBEING STRATEGY REFRESH YEAR 2 DRAFT IMPLEMENTATION PLAN (2018-2019)**

Ms Bimpe Oki presented the report.

The Board commented that:

- The CCG was updating its strategy. One of the key themes would be the area of inequality.
- People who suffered with multiple long-term conditions should probably be considered in alignment with JSNA.
- Further clarity could be sought regarding tackling social determinants. Lambeth Council was a London living wage employer (as was Guy's and St Thomas's hospital and King's College Hospital) and it would be valuable if they could get the appropriate accreditation for this.
- More needed to be done to clarify the link between poverty and ill health and possible resolutions for the issue.
- It was possible to procure better local services which resulted in a greater social value.
- With the alliance work in progress, it was important to be explicit about the focus of prevention and early action in mental health and wellbeing.
- In relation to the strategy development, it was important that the strategies employed to tackle health inequalities did not also create further inequality. It was likely that further development in the area would be reported to the Board in the next 3-6 months.
- There was a considerable amount of work examining areas of disparity between different ethnic communities and how best to address it.

The Board heard that:

- In developing the plan, it became apparent that it was important to tie the objectives into the Health and Wellbeing Strategy.
- It was also important to examine how the work could be

demonstrated and quantified with regard to how the aims and ambitions of the strategy were supported.

- Much of the work was still in progress.
- Some of the risks had been discussed in the staying healthy board and this could be presented to the Health and Wellbeing Board at a future meeting.

The Chair noted that the theme relating to housing had not been fully addressed. As Homes for Lambeth was in the process of addressing health implications in building homes, it was important to emphasise housing elements in all areas of health and wellbeing.

RESOLVED:

1) That the Health and Wellbeing Board agree the draft Lambeth Health and Wellbeing Strategy Refresh Year 2 Implementation Plan, (2018 – 2019), acknowledging that it would need to be reviewed and updated during the course of the year to reflect any significant local and national health and wellbeing changes.

## **5. OVERVIEW OF LAMBETH EARLY ACTION PARTNERSHIP (LEAP) PROGRAMME**

Strategic Director of Children's Services, Ms Annie Hudson and Ms Laura McFarlane introduced the report.

The Board commented that:

- Whilst the report was well received, no clear indicators had been set to measure levels of success.
- A detailed delivery plan regarding targets was available and this would be emailed to Board Members.
- Clear and well supported indicators should be used. It was important to be able to measure how much success could be attributed to LEAP and how much to other areas of work.

The Board heard that:

- Results could not be delivered until the portfolio of interventions was completed in 2025.
- A rigorous effort was been made in relation to carefully considering how best to improve the services being delivered, so small scale intervention could be made where appropriate.
- It was hoped that improvement would be registered on high-level indicators.
- Some data would be made available regarding early years and a relative improvement was expected in this area.

The meeting heard that the pilot was creating teams around children to help those who had some areas of need that needed to be addressed but were not applicable to criteria that already existed. The Board felt that the learning from this area should be made available across professionals from different areas. The Chair stated that more information regarding the interchanging of information from different departments needed to be brought to the Board for consideration.

The Board also heard that:

- The data collection for inequalities was robust and examination had been conducted on how services were designed and delivered.
- In relation to the CAN programme, a number of parents had informed about the proposals which were not practical for them. They felt a different approach was more appropriate in some areas. For example, some foods which related to people from different cultural backgrounds needed to be considered before offering suggestions for an intake of a particular diet or food. A greater awareness of this in general was required.
- Lambeth education was applying for funding regarding school readiness.
- Peer supported programmes helped to support wider community interventions.
- The CCG had a clinical representative who fed into the CCG Board so the CCG was aware of the data being assembled. The CCG's children's Maternity Board was integrated in various areas in the Council and the CCG. The CCG was aware of restrained finances. Work was done collaboratively and the dissemination of information included health visitors and midwives amongst others.
- The oldest LEAP baby was 3 years old and all the evidence had not yet been gathered.
- A monitoring evaluation sub-group was in place. The Evaluation Manager had only started one month ago and the evaluation process would continue as expected.
- FSP data was being moderated for the whole of the borough and a report would be prepared before the end of term.

RESOLVED:

- 1) That the update report be noted.
- 2) That the progress of the LEAP programme towards scale be supported.
- 3) That the key performance indicators for the LEAP programme be noted.

## **6. LAMBETH SUICIDE PREVENTION STRATEGY**

Mr David Orekoya presented the report.

The Chair welcomed the report and stated that it was good to see the

progression of the strategy.

The Board commented that:

- It had been reported on the news that the levels of suicide rates had increased amongst teenagers living in London.
- Any vulnerable individual under the age of 18 would be picked up through the child overview panel.
- There appeared to have been only one suicide in Lambeth in the last few years. There did not appear to be any further significant data regarding suicide rates.
- Further research will be conducted but it was important to note that suicide rates in London were fewer than in other areas of the UK.
- Further work was to be done with SLaM that would allow for greater access of information beyond one borough.
- It was important that planning in areas such as transport, for example, the London Underground would need to take into consideration the possibility of an individual attempting suicide whilst being present in a public transport area. However, TfL was aware of this.

The meeting noted that a significant proportion of people who died by suicide often took their lives at home. However, the purpose of the report was focused on wider preventative issues.

RESOLVED:

1) That the Health and Wellbeing Board formally agree the Lambeth Suicide Prevention Strategy and action plan for 2018/19.

## **7. QUARTERLY REPORT OF THE DIRECTOR OF PUBLIC HEALTH FOR LAMBETH (JANUARY TO MARCH 2018)**

Director of Public Health, Ms Ruth Hutt, introduced the report.

Ms Bimpe Oki informed the Board that:

- The allocation for the sugar levy was £350,000.
- Schools would bid for the money and alongside this, profiles of schools were being considered to see which schools would benefit the most from funding.
- Work would be done with local partnerships to see what they could offer.
- The borough would also be working with Crystal Palace football fund to gain further support.
- Battersea Power Station had said they would see if they could also assist.
- Guy's and St Thomas' Hospital was expected to confirm its

contribution in the coming week – a sum of approximately £100,000.

- It was anticipated that the bidding process would start in the next two weeks.
- It was hoped that a response could be given to the schools before the end of year on how successful their bid had been.
- The approach taken by Lambeth was unique and there was interest in seeing how the process would progress.

The Board noted the progress that had been made, welcomed the report and commented that:

- It was important to note the collaborative work that had been done across the borough. It was important to acknowledge the joint work of various bodies and voluntary organisations.
- At the Princess of Wales annual HIV lecture, Sir Elton John had named Lambeth for its excellent work in the area of HIV.
- Local services, screen tours, a good thinking mental health platform and an alcohol strategy was in place to deal with alcohol related issues in the borough. This work could be submitted to the Board for further consideration.
- Some work had also been done on multiple long-term conditions. This had been subsequent to the work that has been done with King's College Hospital and public health colleagues. Some of the areas of the work had been completed, could be provided to the Board and would be made available in the next report.
- A review of the Lambeth's licensing policy was underway. The borough had approximately 50 24-hour licensed premises. There appeared to be a clear correlation between access to alcohol and excessive use of alcohol.

The Chair stated at the Board wish to congratulate the Do It London team for all their recent efforts, contributions and achievements.

RESOLVED:

- 1) That the report be noted.

CLOSE OF MEETING

The meeting ended at 7:58pm
